⌂ Stavanger, Norway · Norwegian (Native), English (Fluent), French (Fluent)

EXECUTIVE PROFILE

Data Architect, Solution Architect, and Technical Leader with 20 years of experience in data platforms, analytics, and applied AI, including six years at Cognite scaling Industrial DataOps and AI. Since November 2025, serving as Data Architect in the Aker Digital Alliance (ADA) at Aker BP, contributing to the transition from legacy asset-centric hierarchies to modern Cognite Data Fusion (CDF) data modelling across Aker BP's offshore platforms.

Proven track record combining deep technical delivery with practice and people leadership across Sopra Steria, Advania (formerly Solv), Cognite, Visma bWise (now Twoday), IBM, and Accenture. Experienced in operationalizing industrial and enterprise AI by integrating real-time OT sensor streams, 3D models, and engineering diagrams alongside cloud-native data architectures (Azure, Databricks, GCP, Fabric, PostgreSQL) and modern LLM/agentic workflows (Azure AI Foundry, RAG, MCP, Copilot Studio). Known for bridging executive strategy, domain engineering, and production software engineering.

CORE COMPETENCIES & TECHNICAL STACK

DATA & PLATFORM ARCHITECTURE

Cognite Data Fusion (CDF), CDF Data Modelling & Contextualisation, Operational Technology (OT), Databricks, Microsoft Fabric, Azure Data Factory, Azure Synapse, PostgreSQL, Data Governance & Strategy

AI, GENAI & SOFTWARE ENGINEERING

Applied ML, Predictive Maintenance, LLMs & RAG, AI Agents & MCP, Azure AI Foundry, Azure AI Search, Copilot Studio, Python, Cognite Python SDK, FastAPI, React.js, Java/Kotlin, Pytest

CLOUD, DEVOPS & LEADERSHIP

Azure (Container Apps, Functions, Entra ID, App Insights), GCP, Docker, Terraform, Azure Bicep / ARM, GitHub Actions CI/CD · Data Science Leadership, Pre-Sales, AI Maturity & Roadmaps

PROFESSIONAL & PROJECT EXPERIENCE

Sopra Steria — Stavanger & Haugesund, Norway · Manager — Aug 2025 – Present

Regional Community Lead for Data Intelligence, Rogaland — Aug 2025 – Present

- **Regional Practice Leadership:** Leading Sopra Steria's Data Intelligence and AI community across Stavanger and Haugesund, driving technical standards, consultant mentoring, and cross-project knowledge sharing.
- **Commercial & Strategic Advisory:** Building internal AI capabilities and partnering with enterprise and public-sector clients on AI maturity assessments, data & AI roadmaps, pilot prioritization, and solution scoping across energy, maritime, and industry.
- **Recruitment & Team Growth:** Responsible for regional recruitment and growing the Data Intelligence team in Rogaland.

Data Architect — Client Assignment: Aker BP / Aker Digital Alliance (ADA) — Nov 2025 – Present

Aker Digital Alliance · Key programmes: N-DIGI & Remote Operations across Aker BP's offshore portfolio

Aker Digital Alliance unites technology partners and domain specialists to accelerate digital transformation across Aker BP's fields through automation, industrial data platforms, and digital twins supporting digital-first operations and near-zero emissions targets.

- **CDF Data Modelling Transition:** Advancing enterprise data architecture within Cognite Data Fusion as part of the move from legacy asset-centric hierarchies to modern, flexible CDF data modelling across Aker BP's offshore installations.
- **Model Design & Onboarding Strategy:** Designing and implementing the new core data models, defining the prioritization and sequence in which source systems are onboarded, and planning platform scaling for AI and digital-twin use cases driven primarily by the Yggdrasil field development.
- **Stakeholder & Vendor Alignment:** Working directly with operational users and platform vendors to translate domain requirements into durable data models and concrete architectural decisions.

Advania Norge (formerly Solv) — Stavanger, Norway · Team Manager & Solution Architect — Jul 2024 – Jun 2025

Team Manager & Solution Architect — AI & Cloud Data Platforms — Jul 2024 – Jun 2025

Combined people leadership and pre-sales with hands-on AI and cloud data platform architecture

- **Team Building & Delivery Management:** Built and led the AI delivery team in Stavanger with end-to-end responsibility for recruitment, people management, resource allocation, pre-sales proposals, and project execution.
- **Full-Stack AI & GenAI Delivery:** Designed and built AI applications (Python, FastAPI, React.js) and enterprise LLM/RAG assistants (Azure AI Foundry, Azure AI Search, Copilot Studio) across public transport, maritime shipping optimisation, and enterprise automation.
- **Cloud Infrastructure & CI/CD:** Deployed containerized workloads on Azure Container Apps and Azure Machine Learning Studio; built automated CI/CD pipelines and infrastructure-as-code using Azure Bicep and ARM templates.
- **Microsoft Fabric Modernization:** Led a proof-of-concept and architectural evaluation on Microsoft Fabric, advising the client on migrating from Azure Synapse Analytics to Fabric for unified data integration and analytics.

Cognite AS — Stavanger / Global · Solution Architect, Data Scientist & Head of Data Science — Jun 2018 – Jun 2024

Head of Data Science (Interim, Global) — 2022 – 2023

Led Cognite's global Data Science organization across international offices, bridging executive strategy with technical delivery across oil & gas, renewables, and manufacturing.

- **Global Team & Culture Leadership:** Supervised, mentored, and scaled a multidisciplinary global team of data scientists and analysts, managing recruitment, onboarding, competency development, and high employee engagement.
- **ML Methodology & Production Standards:** Established engineering standards and best practices for developing, validating, deploying, and operating machine learning models in production across all customer-facing data science teams.
- **Strategic Portfolio & Tooling:** Partnered with internal R&D, Product Management, and customer executives to prioritize high-impact AI initiatives (predictive maintenance, production optimisation) and evaluate emerging ML tooling.

Solution Architect — Industrial IoT & Data Platforms — Jun 2018 – Jun 2024

Contributed to Cognite's rapid growth by shaping Cognite Data Fusion (CDF) into a scalable Industrial IoT platform, turning raw OT/IT data into production analytical applications.

- **Industrial OT/IT Contextualisation & Cloud Architecture:** Delivered scalable solutions across Cognite Data Fusion, Databricks, Microsoft Azure (Functions, Data Factory, Entra ID, Application Insights), and GCP, integrating real-time sensor streams, 3D models, and P&ID process diagrams into production AI applications.
- **Engineering, CI/CD & Security:** Built data processing and AI components primarily in Python (and Java/Kotlin where required), automated testing and delivery with Pytest, GitHub Actions, Docker, and Terraform, and implemented access control, data quality checks, logging, and alerting.
- **Open-Source SDK Contributions:** Contributed features and improvements to the open-source Cognite Python SDK, championing reusable, documented, and testable software engineering practices across the developer community.

Cognite Data Fusion · Cognite Python SDK · Python · Java / Kotlin · Databricks · Azure · GCP · Docker · GitHub Actions · Terraform · PostgreSQL · Pytest

Visma bWise (now Twoday) — Stavanger, Norway — May 2016 – May 2018

Senior Solution Architect — May 2016 – May 2018

- **BI Architecture & Analytics Delivery:** Designed and implemented interactive Business Intelligence applications and data warehouse pipelines using QlikView, Qlik Sense, and TimeXtender to transform raw enterprise data into decision support.
- **Data Governance & License Optimisation:** Established client data governance and reporting frameworks, advised on BI tool selection and software license optimisation to reduce operational costs, and delivered end-user training and handover.

IBM — Stavanger, Norway — Apr 2012 – Apr 2016

Senior Consultant — Apr 2012 – Apr 2016

- **Business Analytics & Process Optimisation:** Designed and implemented advanced analytics, statistical modelling, and process optimisation solutions for clients in the oil & gas sector to improve operational efficiency and decision-making.
- **IBM Watson & Cognitive Computing:** Applied IBM Watson technologies (Natural Language Processing and cognitive search) alongside IBM DataStage, DB2, and Cognos to extract actionable insight from unstructured engineering and operational data.

Accenture — Oslo & Stavanger, Norway — Aug 2007 – Mar 2012

Consultant — Database, Data Warehousing & Management Consulting — Aug 2007 – Mar 2012

- **Database, Data Warehouse & Reporting Solutions:** Spent three years on a major public-sector programme designing and implementing relational databases, enterprise data warehouses, high-volume batch/ETL workflows, and interactive reporting solutions across decision levels.
- **Management Consulting:** Transitioned into management consulting, advising enterprise clients on data-driven strategy, business process optimisation, and technology transformation.

EDUCATION

MSc (Sivilingeniør) in Industrial Mathematics — 2000 – 2005
NTNU — Norwegian University of Science and Technology

Master in Management: Finance d'Entreprise — 2005 – 2007
CERAM (SKEMA Business School), France

SELECTED COURSES & PROGRAMMES

AI-Akademiet — Sopra Steria — 2026

Hands-on engineering programme in Generative AI, AI-assisted development, autonomous AI agents, Model Context Protocol (MCP) integrations, context engineering, containerized agent runtimes, Copilot CLI, and AI security/governance guardrails.
